

Preventing Construction Defects, Moisture Intrusion & Mold Workshop

Date:	Thursday, February 8, 2018
Location:	Renaissance Baton Rouge Hotel 7000 Bluebonnet Boulevard Baton Rouge, LA 70810
Registration:	8:30 AM – 9:00 AM
Time:	9:00 AM – 5:00 PM (lunch not included, but available on-site for purchase)
Fees:	AIA Member - \$200 Non-AIA Member - \$395
Instructors:	Wynn L. White, P.E. and Chris White, P.E., LEED A.P., CBCP

This workshop uses simple science and engineering principles to help attendees prevent construction defects, moisture intrusion and mold.

Attendees will be prepared for the inevitable flooding of a building as well as what to design and look for during construction in order to avoid the defects that lead to moisture intrusion and mold.

Attendees will also learn how to prepare for and respond to a flood as well as how to avoid mold.

It is a fast-paced, action-packed workshop where you'll learn how to identify potential problems in advance, design to avoid problems, collaborate with the remediation and general contractor and subcontractors, benchmark and measure performance and teach (using the results from the benchmarking and measurements) everyone on the job site to avoid defects and mold growth.

Discussion and presentation will be specific to management of building construction issues and integrated management systems to solve and prevent problems.
